Project

Voice gender recognition

Developed a Voice Gender Recognition system using Python and machine learning to classify male and female voices based on audio features. Implemented audio processing techniques and trained models for accurate voice prediction.

ATMOSPHERIC HARVESTING

"Developed an atmospheric water harvesting system to extract moisture from air and convert it into usable water.

Focused on condensation and filtration techniques to ensure efficient and clean water output."

Objective

"Aspiring computer science engineer with strong coding skills and problem-solving abilities, eager to join a dynamic organization where I can learn, grow, and contribute to impactful software solutions."

Skills

PYTHON

★★★★☆

JAVA

★★★★☆

C

★★★★☆

HTML

★★★★☆

C++

★★★☆☆

Certification

C language

Completed C Programming Certification, demonstrating proficiency in writing efficient code, implementing algorithms, and applying structured programming concepts for software development.

JAVA

Earned certification in Java Programming, covering core concepts such as OOP, exception handling, collections, and multithreading. Enhanced coding efficiency through hands-on projects.

Python

Completed Python Programming Certification, demonstrating proficiency in scripting, object-oriented programming.

C++

Certified in C++ Programming – strong foundation in object-oriented programming and problem-solving.

Claude AI

Certified in Claude AI with knowledge of advanced AI capabilities and usage.
